Subject	<ul style="list-style-type: none"> • ENVIRONMENT
Short Description	<p>The general objective of the PHAROS4MPAs project is to enhance management effectiveness and networking for Mediterranean MPAs, in order to contribute to the conservation of marine biodiversity and natural ecosystems, taking into account the complex ensemble of human activities developed within the Blue Growth perspective and their interaction with protected areas and marine ecosystems. To achieve this goal PHAROS4MPAs supports the implementation of EU maritime policies for the sustainable management of human activities and the protection of Mediterranean ecosystems.</p>
Deliverables	<ul style="list-style-type: none"> • Communication plan preparation and implementation, including mapping stakeholders, public relations strategy and activities, social media etc. • Translation, lay out & printing of the recommendations, case studies, policy document. • Planning the capitalization baseline. • A consistent synthesis of all the results that need to be capitalized for the aquaculture sector. • Capitalisation project on aquaculture and MPAs.
